Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If no period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 28 July 2005.
 2a) This action is FINAL. 2b) This action is non-final.
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

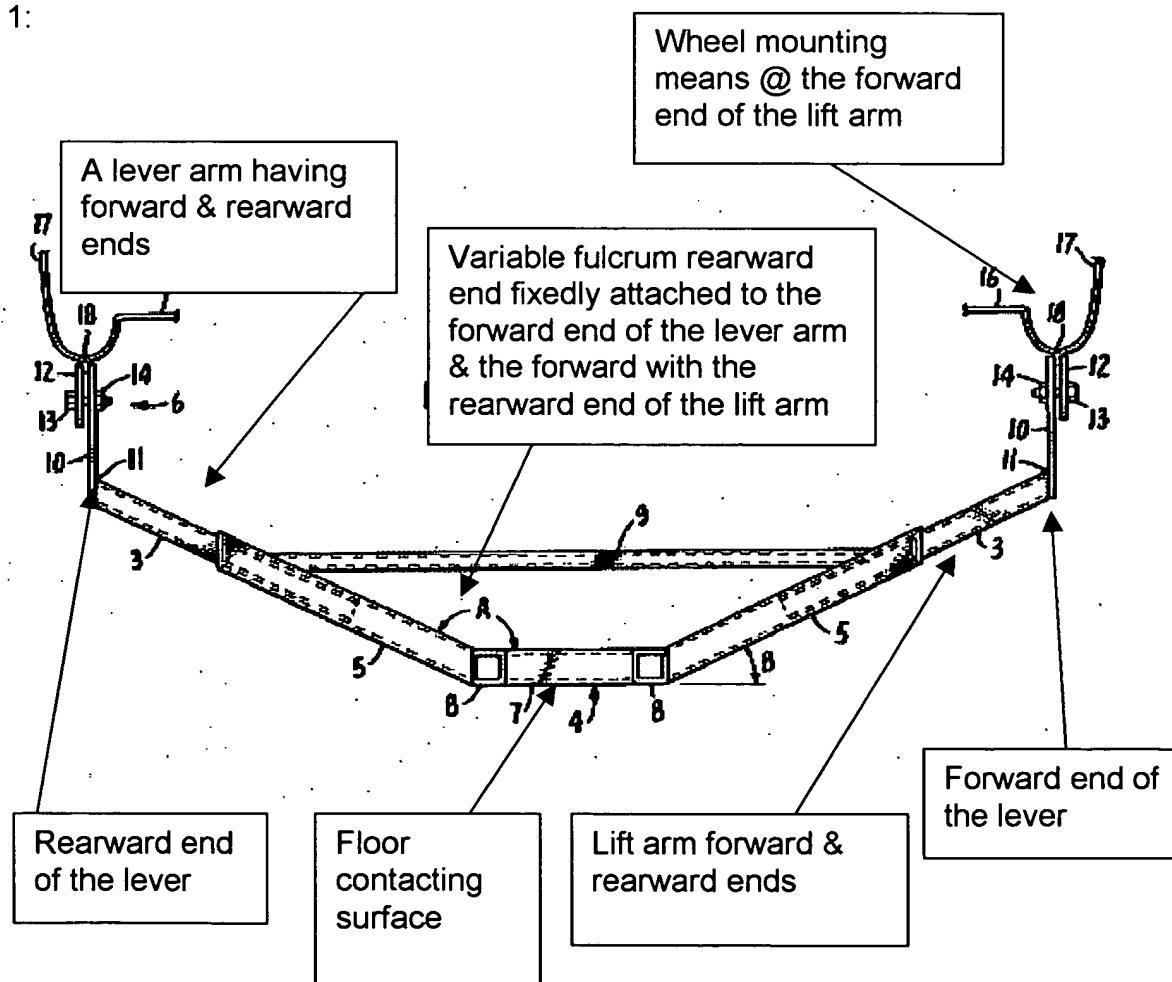

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 4836739 of Cappelletto et al.

Prior art discloses vehicle/tractor lift/tilting comprising:

cl. 1:

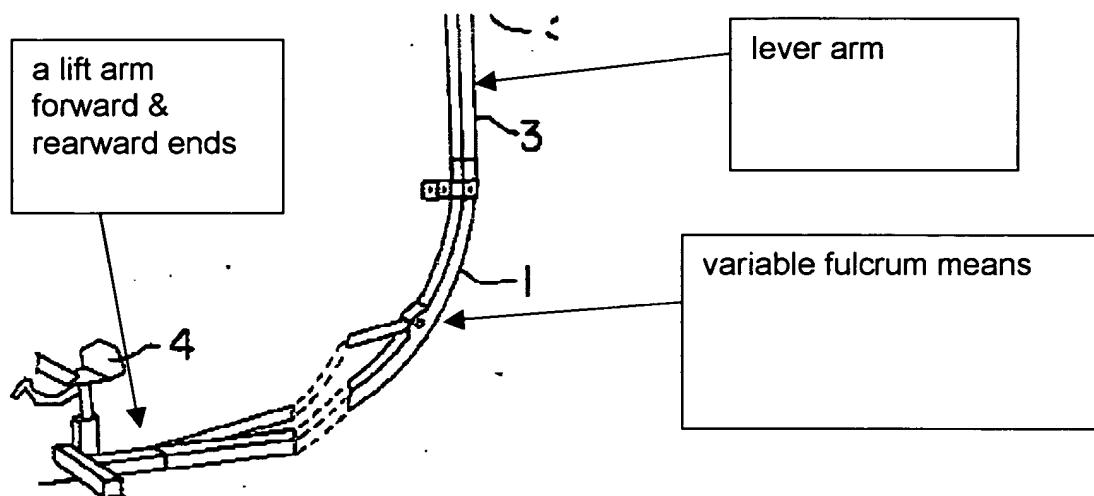

upon alternate levering & counter levering of the lever arm moving the floor contacting surface rearwardly toward the rearward end of the lever arm and forwardly toward the forward end of the lift arm.

3. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 4579505 of Lauritsen.

Prior art discloses:

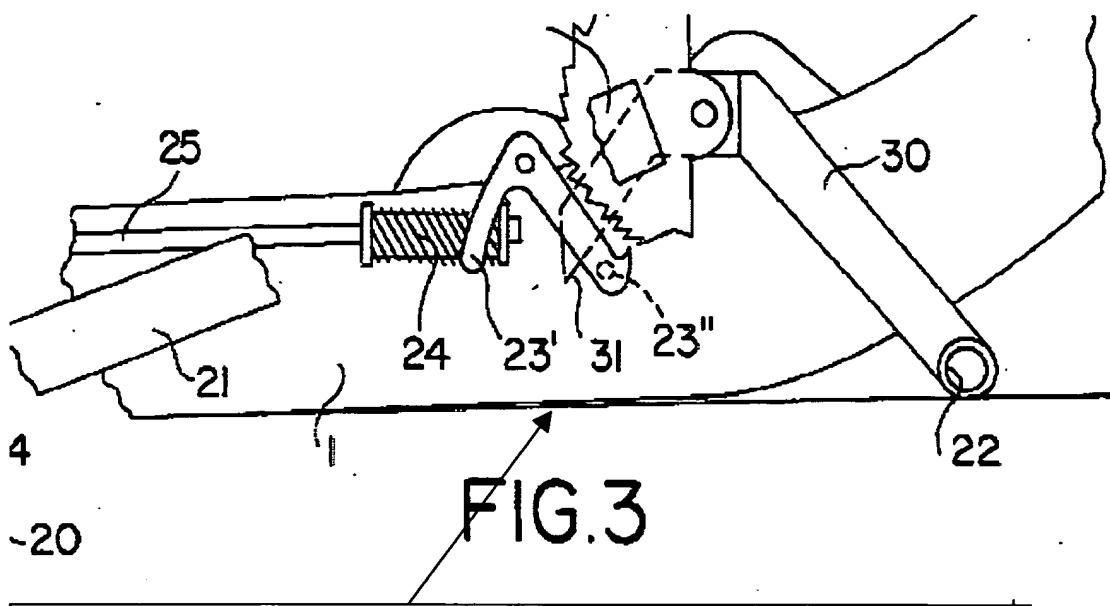

cl. 1:

wheel mounting means / wheel carriage (4; col. 2, ln 53) fixedly attached to the forward end of the lift arm (as shown in the figure above);

a lever arm (3);

variable fulcrum means having a forward end fixedly or wholly formed with the rearward end of the lift arm, and a rearward end fixedly or wholly formed with the forward end of the lever arm (as shown in the figure above);

A floor contacting surface, upon alternate levering & counter levering of the lever arm moving the floor contacting surface rearwardly toward the rearward end of the lever arm and forwardly toward the forward end of the lift arm

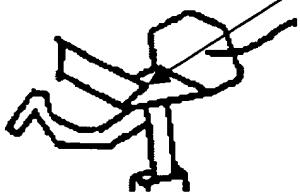

cl. 2:

wheel mounting means comprises a tire cradle / wheel carriage (4; col. 2, ln 53);

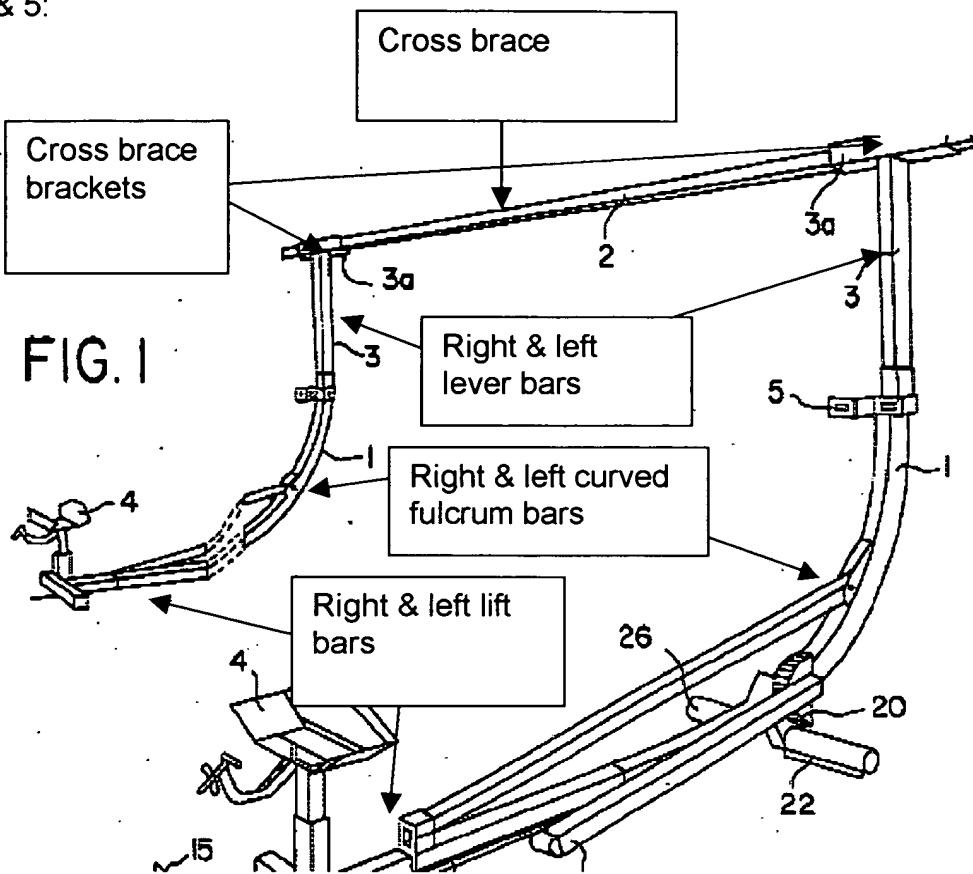

cl. 3:

wheel mounting means comprises:

Pivoting means connected **operatively** to the left and right ends of the cradle & forward end of the lift arm (tire pivots about mid point of the cradle)

cl. 4 & 5:

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 6-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lauritsen (4579505), in view of Stone (4549721).

Lauritsen discloses the claimed device including the D braces (cl. 8) except for an additional cross brace.

Stone discloses that it is known in the art to provide an additional cross brace (ref 45; col. 3, ln 26).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the device of Lauritsen with the teachings of Stone, in order to provide further reinforcement & stability for the device of Lauritsen.

Response to Arguments

6. Applicant's arguments with respect to claims 1-11 have been considered but are moot in view of the new ground(s) of rejection.

It is noted that the amendment of claim 1, especially removal of the "pivot point" and addition of "floor contacting surface" required a new search and examination.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Weimar, Crabtree et al., Hogan, Liqui.
